

Brian Crabtree

Senior Web Architect · React 19 · TypeScript · Web Performance

Gilbert, Arizona · Open to remote / hybrid (US)

briancrabtree.me · brian@briancrabtree.me · LinkedIn · GitHub

SUMMARY

Senior web architect with 25+ years shipping production web systems—from hand-coded HTML through modern React SPAs. Builds fast, maintainable marketing sites, dashboards, and internal tools for teams that treat performance and clarity as product requirements.

Production portfolio holds lab PageSpeed 100/100/100/100 (mobile and desktop). Stack: React 19, TypeScript, vanilla CSS, Vite, Firebase, Linux. 400+ client engagements as an independent architect; lead-level NDA work in regulated SaaS and enterprise environments.

CORE COMPETENCIES

- | | |
|---|--|
| — Frontend architecture · React 19 · TypeScript | — Web performance · Core Web Vitals · PSI |
| — Semantic HTML · accessible UI patterns | — SPAs · marketing sites · technical SEO |
| — Firebase · serverless · Linux deployment | — Scoped delivery · staging · NDA programs |

EXPERIENCE

Senior Web Architect · briancrabtree.me (Self-employed) Jan 2024 – Present

- Rebuilt platform on React 19, edge delivery, serverless content—journal, leads, admin without CMS bloat.
- Sustained 100/100/100/100 Lighthouse on production; published OSS starters and performance field notes.
- Own design tokens, prerender shell, performance budgets, auditable deploy paths.

Independent Web Architect · Self-employed 2015 – 2024

- 400+ end-to-end engagements: architecture, build, launch, post-launch remediation.
- High-conversion landings, React dashboards, performance hardening for SMBs and agencies.

Lead Architect · Confidential · Regulated SaaS ~2019 – 2022

- Multi-tenant SaaS boundaries, API gateway patterns, rollout strategy, front-end SLAs under load.

Frontend / Systems Handoff · Confidential · Data-heavy product ~2014 – 2018

- High-concurrency pipelines with backend teams; observable failure modes; operator diagnostics from JS.

Lead Designer / Developer · Digital agencies 2005 – 2015

- Responsive design and front-end delivery through the static-to-interactive transition.

JavaScript Modernization · Confidential · Enterprise ~2007 – 2013

- Legacy JS performance at scale where full rewrites were not an option.

Web Developer · Freelance & agency 2000 – 2005

- Hand-coded HTML/CSS; early e-commerce and brochure sites.

SELECTED PUBLIC WORK

briancrabtree.me	Architecture, build, performance, content platform
------------------	--

pure-react-19-vanilla-starter	React 19 + Vite reference implementation (GitHub)
react-pubsub-store	React 19 external store pattern (GitHub)
vanilla-css-tokens	Design-token system without utility frameworks

TECHNICAL SKILLS

Stack: TypeScript, JavaScript, React 19, HTML5, CSS3, Vite, Node.js, Firebase, Linux · Lighthouse, PSI, Git · performance budgets, semantic markup, technical SEO

Credentials: Google Cloud (architecture & infrastructure, verified) · 25 years continuous web engineering

References and case studies on request. Client names withheld under NDA.
